

Test Plan for Restful Booker API

Document Reference: Restful Booker API Documentation (PRD)

Test Plan Version: 1.0

Date: 14 June 2026

Prepared By: Grok (AI Test Engineer)

1. Introduction / Objective

The objective of this test plan is to verify that the Restful Booker API meets all functional and non-functional requirements specified in the provided API documentation. Testing will ensure correct behavior of all endpoints, proper handling of authentication, data validation, error scenarios, supported formats (JSON, XML, form-urlencoded), and overall API reliability.

Scope:

- In Scope: All documented endpoints, request/response formats, authentication mechanisms, query parameters, path parameters, headers, and success/error flows.
- Out of Scope: Performance/load testing, security penetration testing (beyond basic auth), mobile/client-specific integration, database-level testing, and any undocumented features.

2. Test Items (Features / Endpoints to Test)

Endpoint | Method | Key Scenarios

Endpoint	Method	Key Scenarios
POST /auth	POST	Create token (valid/invalid credentials)
GET /booking	GET	Get all booking IDs + filters
GET /booking/{id}	GET	Retrieve single booking
POST /booking	POST	Create booking (multiple formats)
PUT /booking/{id}	PUT	Full update booking
PATCH /booking/{id}	PATCH	Partial update booking
DELETE /booking/{id}	DELETE	Delete booking with auth
GET /ping	GET	Health check

3. Test Approach / Strategy

- Functional Testing (Positive & Negative)
- Boundary Value Analysis
- Data-driven testing (JSON/XML/Form)
- Authorization Testing
- Error Handling

4. Test Cases Overview

Detailed test cases for each endpoint are defined based on the PRD, including positive, negative, and edge cases.
